Why Sponsor Us?

UCI Solar Car FSGP 2025

When you sponsor UCI Solar Car, you're backing more than just a Solar Car, you're investing in the next generation of engineers solving real problems. At UCI, a recognized leader in research and sustainability, our team builds innovative technologies that advance the frontier of clean energy. Your support puts your brand alongside that mission, reaching students, faculty, industry, and competition audiences across the country.

Our work is driven by student engineers who pursue practical, real-world solutions that push the boundary of solar racing technology while developing skills that make them exceptional future hires. Sponsoring UCI Solar Car connects you directly with a talent pipeline.

We take pride in our diverse team, welcoming students from all majors, years, and backgrounds, building a supportive community where members learn from one another, grow towards shared goals, and travel to competitions to connect with teams from campuses across the country. Support us, and your name travels with a team that's accelerating forward. UCI Solar Car is powered by the support of organizations that share our commitment to innovation and sustainability. We're proud to recognize the following as our sponsors:

Meet the Team

UCI Solar Car FSGP 2026

UCI Solar Car is the student-run solar vehicle team at the University of California, Irvine. We take a **multidisciplinary** approach, bringing students together to design, build, and race a solar-powered vehicle. UCI Solar Car is composed of **60+ members** spread across **9 subteams**, giving members room to grow in engineering, business, outreach, and leadership.

Mechanical Subteams

Aerobody	Chassis	Suspension	Human Interface
Designing, simulating, and fabricating the solar car's aerodynamic shell.	Designing and manufacturing a lightweight, durable, and safe chassis that unites all vehicle subsystems.	Designing, manufacturing, and testing the vehicle's front and rear suspension and steering systems.	Designing and mounting all driver-facing components to improve safety and ergonomics.

Electrical Subteams

Solar Array	Battery	Powertrain	Embedded
Designing, manufacturing, and testing the solar array that powers our vehicle on and off the track.	Designing and manufacturing the battery system that powers and moves our solar car.	Designing and implementing our motor system, powertrain electronics, and fuse panel.	Manages low-voltage systems, including dashboard, programming, lighting, communications, controls, and safety.

Operations

Working on sponsorships and marketing outreach to supply components and financial support for all manufacturing needs. Develop team logistics through member recruitment and outreach, competition planning, and team bonding events.

OUR RACES

Formula Sun Grand Prix

The Formula Sun Grand Prix (FSGP) is an annual competition and qualifier for the American Solar Challenge. The event begins with scrutineering, where each team's car undergoes rigorous electrical, mechanical, and safety inspections—including sizing, weigh-ins, and dynamic testing. Once approved, teams race to complete as many laps as possible over three days, testing the car's speed, endurance, and reliability. Only teams that meet the required lap threshold advance to the American Solar Challenge, making every moment on and off the track count In 2026, UCI Solar Car finished scrutineering first out of the entire field, earning pole position, and raced 114 laps (353 miles) to a P10 finish.

American Solar Challenge

The American Solar Challenge (ASC) is a biennial North American cross-country solar car race where collegiate teams that qualify compete over a 1,500–2,000 mile route with multiple stages and checkpoints. Teams follow comprehensive ASC regulations, building upon FSGP standards, and must design, build, and race fully solar-powered vehicles that meet strict performance, safety, and reliability requirements. With over 20 years of history, the ASC attracts top universities worldwide, providing a rigorous test of engineering, endurance, and innovation.

Vehicle Development

2023

UCI Solar Car is founded, launching development of our first-ever solar car, SolEater, bringing together engineering students across UCI.

2025

Our first-ever FSGP competition, where we received an electrical capacitance award and managed to complete 90% of scrutineering.

2026

Returned to FSGP with a refined SolEater, where we completed scrutineering first, earning us pole position, and went on to complete 114 laps, finishing P10 and 7th in the nation.

Present

Starting new development of our second vehicle. Motivated to learn from our mistakes, improve our standing, and compete in ASC 2028.

Sponsorship Benefits

	Friends <$3,000	Bronze $3,000+	Silver $7,000+	Gold $10,000+	Platinum $30,000+

Friends

Under $3,000 monetary of comparable contributions

Tax Deduction

The UCI Foundation is a registered 501(c)(3) nonprofit organization. Your contribution may be **tax deductible. Please consult your tax advisor.**

Logo on Website

Our website is our main source of information. We make it our priority to promote our website through various events and activities on campus. Sponsors at this tier will have their **logo displayed on the Sponsor Page of our website.**

Bronze

$3,000+ monetary of comparable contributions

LOGO ON THE SOLAR CAR

At the Bronze tier, we will feature your **logo on our car** as it takes the stage at a national collegiate multi-day race with extensive media coverage. Your logo will be featured alongside those of the Silver, Gold, and Platinum sponsors.

RESUME BOOK

We aim to give companies that sponsor us the exposure they seek to **reach students and potential future employees.** At the same time, our students gain the opportunity to be recognized by these companies, allowing them to select from a pool of members who already have hands-on experience and have been carefully selected to be part of our team.

Silver

$7,000+ monetary of comparable contributions

LOGO PRIORITY PLACEMENT

With your support at the Silver level, our team can not only bring our design to life but also provide a priority placement for your logo. Your logo will be both **externally and internally on the vehicle**, giving multiple opportunities for viewers and media to see your support.

SOCIAL MEDIA PROMOTIONAL POST

A thank you post on our social media platforms, reaching daily users and engaged students. We will continue to highlight your support, ensuring that competition photos showcase your sponsorship and are included in news articles and official UCI postings.

LOGO ON TEAM APPAREL

All photos taken of our team feature our customized team uniforms. For your generous support, UCI Solar Car will proudly **display your logo on our team uniforms** worn for racing, outreach, and recruitment events.

Gold

$10,000+ monetary of comparable contributions

Invitation to UCI Solar Car Events

Gold tier sponsors will have the opportunity to get a personal look at our project and meet the engineers behind the car! Event possibilities include a **workshop tour, exhibition, networking event, design reviews, testing days, or an event of your choosing**.

Recognition at Events & Media

In outreach events, such as the School of Engineering Design Reviews, we display our work and progress for thousands of students and faculty. To show our appreciation, we will feature your **logo on banners, social media posts, and other event materials.** Your logo will also be more prominent on the vehicle and in full color.

Platinum

$30,000+ monetary of comparable contributions (at least $15,000 which must be monetary)

Title Sponsor

Title sponsors get the **largest logo placement on the car, top billing on all team materials, and featured recognition at every race, presentation, and outreach event we attend.** Our race vehicle will be **named after you**, thus your brand rides with us across the hundreds of laps at the Formula Sun Grand Prix and the hundreds of miles of the American Solar Challenge route, allowing your brand to reach thousands of students, engineers, and industry contacts. We reserve this tier for **one sponsor each season.**
